

DAMARUS NGANKOU

APPLIED AI & AUTOMATION ENGINEER

Douala, Cameroon | Open to relocation & remote | +237 674 411 479 | damarusngankou@gmail.com | linkedin.com/in/damarus-ngankou | damarus-portfolio.vercel.app

PROFESSIONAL SUMMARY

Applied AI and Automation Engineer with a software-engineering background and 2+ years specialized in AI automation, Generative AI, and agentic systems. I build production-grade AI workflows that integrate LLMs (Claude, OpenAI) into real business processes through Python/FastAPI services, automation platforms (n8n, Make, Zapier), and RAG pipelines with vector databases. I own delivery end to end, from requirements discovery and client demos to monitored, documented, production-ready systems. Bilingual (English and French).

TECHNICAL SKILLS

AI & Generative AI	LLM integration (Claude, OpenAI), prompt design, structured outputs, LLM evaluation, RAG, fine-tuning
Agentic Systems	LangChain, LangGraph, AI agents, tool calling, MCP, structured tool use
Vector & Retrieval	Pinecone, pgvector (Supabase), embeddings, semantic search
Automation Platforms	n8n (self-hosted and cloud), Make, Zapier, workflow orchestration, webhooks
Backend & APIs	Python, FastAPI, Node.js, TypeScript, REST APIs
Production & Cloud	Docker, AWS / GCP / Azure, CI/CD, monitoring and observability (LangSmith, OpenTelemetry)
Data & Integrations	PostgreSQL, Supabase, Google Workspace, OAuth 2.0, Slack
Ways of Working	Prototype-to-production, reliability engineering, client-facing delivery, technical documentation

PROFESSIONAL EXPERIENCE

AI & Automation Project Lead - Nubet France	Remote March 2026 - Present
- Lead the design, build, and operation of production AI automation workflows on self-hosted n8n across SEO, content, data, and social-media pipelines. - Built an AI website-QA system (43-node n8n workflow with a dual LLM validation pass) that cut per-site review from 3-16 hours to 1 minute of human time, freeing 86 hours/month (1,030 hours/year) and lifting QA capacity from a 25 sites/month ceiling to effectively unlimited, scaling agency revenue without new hires. - Cut report turnaround from 1-3 days to 8 minutes on demand (24/7) and reduced cost per site by 75% on ~\$32/month infrastructure. - Built an AI-powered SEO audit engine (n8n, Apify, LLM) that reduced manual QA time by 90% and audits hundreds of pages per run. - Architected a distributed browser-automation system (Python, FastAPI, Playwright) with ordered multi-agent failover, making one-click asset retrieval 10x faster with zero single point of failure. - Built an autonomous content publisher (RSS to LLM script to avatar video to official social API) and standardized reliability and observability across all LLM calls (retry-with-backoff, model fallback, error sub-flows, tracing); self-hosted and monitored on Hetzner, Cloudron, and Netdata.	

- Delivered **30+** production automation and AI-integration projects for international clients on n8n (self-hosted and cloud), Make, and Zapier, in a fast-paced, client-facing environment.
- Built an **AI Voice Calling Assistant**: an autonomous outbound-calling pipeline (n8n, Vapi, LLM, Supabase) that reads contacts, places real AI voice calls, analyzes each transcript, and updates the CRM fully unattended.
- Built **RAG knowledge assistants** integrating LLMs (Claude, OpenAI) with vector databases (Pinecone, pgvector) and embeddings for grounded, cited answers, with guardrails against hallucination.
- Built **resilient LLM content-automation** pipelines with agentic orchestration (LangChain, LangGraph), model fallback, and error alerting for scheduled, unattended publishing.
- Ran discovery calls and demos; shipped fast prototypes and hardened them into production with testing, Docker deployment, cloud (AWS/GCP), monitoring, and documentation.

SELECTED PROJECTS - full case studies at damarus-portfolio.vercel.app

AI Voice Calling Assistant, RAG Knowledge Assistant, Distributed Asset Automation System, AI SEO Audit Engine, Autonomous TikTok Publisher, and Resilient LLM Content Automation.

EDUCATION

Bachelor's Degree in Software Engineering
University Institute of Technology (IUT), Douala | 2024

CERTIFICATIONS

Full-Stack Web Development
Simplon x Organisation Internationale de la Francophonie (OIF) | 2025

LANGUAGES

English - Fluent (professional)
French - Native

INTERESTS

Travel | Football | Video games | Cooking
